# The Value of NI Certification

Join the nearly 20,000 certified professionals worldwide who demonstrate their skills with NI products so that anyone, whether managers, customers, or peers, can be confident in the quality of their work.

## Validate Your Expertise

- Demonstrate skills and work quality
- Inspire confidence in managers, peers, and customers

## Differentiate Yourself

- Set yourself apart from your colleagues
- Be known for your expertise

## Network With Peers

- Access private online communities
- Learn from and interact with other certified professionals at annual certification summits

## Standardize Across Your Organization

- Use uniform and secure exams worldwide
- Invest in your employees' success, gauge their skills, and ensure work quality
- Clearly define and reward technical skill development goals for individuals
- Recognize technical leaders and develop communication channels and communities that promote the use of best practices and quick problem resolution

---

"Now that I am certified, I'm more respected at work, I'm more respected by customers, and I'm more respected by attendees of my local user group."

Richard Thomas, CLA, CLED, CTD

---

"I got certified to enhance my learning and marketability. In preparing for certification and then later interacting with other certified professionals, I learned things I wouldn't have otherwise. A certification makes it easier for my customers and employers to judge my skill level."

Sudhir Gopinath, CLA, CTD, CPI

---

"I'm much more in touch with the community of LabVIEW programmers, always learning and contributing. I maintain my certification to stay in touch with the community, with NI, and so that other LabVIEW Architects working with prospective customers will take me seriously."

Joerg Hampel, CLA
